

题目 A:Directions:

Write an essay of 160-200 words based on the following drawing. In your essay, you should

- 1) describe the drawing briefly,
- 2) explain its intended meaning, and then
- 3) give your comments.

You should write neatly on ANSWER SHEET 2. (20 points)

1、

In the picture above, towards their destination head **two handicapped men**, leaving their walking sticks far behind. At the lower part of the drawing, there are several Chinese characters which read “you have one leg and so do I, thus we can go anywhere if we are together”. Simple as it is, what the vivid picture conveys to us is the importance of cooperation.

Now we are entering a brand new era full of opportunities and innovations and so fierce is the competition that most of us overlook the significance of collaboration. However, it still plays an indispensable role in our life. As we go deeper into this topic, we can see that there are several reasons accounting for it. First, due to the competitive society, people may pay a high price for the unhealthy competition, such as facing the crisis of bad relationships, excessive stress or poor sleep. Furthermore, cooperation has its own advantages, as the picture shows. It is much easier for common people to achieve the goals with teamwork. Additionally, we can make ourselves dispense with the negative effects of competition and enjoy a good health in physiology and psychology.

As far as I am concerned, we need take cooperation seriously, especially in society nowadays. We individuals must be aware to cooperate with others and our society should form a good atmosphere of encouraging cooperation. Therefore, we will have a brighter future.

2、

As is shown in the picture, the **two disabled persons** whose crippled legs are tied together do a lot of traveling. Accordingly, this far-reaching picture reflects a common phenomenon in today's society: only through mutual aid can people go further.

There are several reasons accounting for this. Since we have to live in an on-the-move lifestyle, we may encounter various plights, where we would be at a loss rather than seek for others' assistance. Furthermore, if we do not offer help to each other when we confront dilemma, we would not realize our dream. And no issue in China is as basic to build up the society in harmony as to conduct coordination in face of disasters.

Judging from what have been argued above, people have come to realize the value of mutual aid. It is, therefore, necessary that some effective steps be made to advocate spirit of supporting each other. To begin with, the government should make laws to encourage people to unite. In addition, people should enhance the awareness of caring each other especially when they are in trouble. Only in those ways, can we make people, even not being acquaintance, help each other.

3、

As is illustrated in the picture, there have **two disabled persons** whose crippled legs are bound together and hold each other's shoulders tightly, with crutches put aside. There has been a heated discussion about this picture in the Internet recently. Simple as the picture is, the symbolic meaning behind it is as deep as the ocean.

The purpose of the drawing is to show us that utmost importance should be attached to cooperation. There are several reasons accounting for this. Since we live in a fast-paced society, cooperation can save people a great deal of time by eliminating hours on the same easy things, so they would be able to concentrate more time and energy on the difficult problems together. Furthermore, one's energy gradually wears off one's thought, creative thinking and exploration spirit have been stifled by collaboration.

Judging from what have been argued above, people have come to realize the value of cooperation. It is, therefore, necessary that some effective steps should be made to advocate spirit of supporting each other. To begin with, the government should make laws to encourage people to unite. In addition, people should enhance the awareness of cooperation. Only in these ways, can we make people, even not being acquaintance, help each other.

4、

As is symbolically illustrated in the cartoon, supporting each other with their powerful hands, handicapped and adolescents are continuing their new journey on the ground. Crutches left behind, they have successfully cracked the hard nut of lameness which might have majority of the disabled. There has been a heated discussion about this picture in the Newspaper recently. The implication is not only informative, but instructive as well.

Undoubtedly, we can deduce from the portrayal that the cartoonist is trying to attract our attention to the issue of cooperation. With the development of economy and society, competition is becoming increasingly fierce, and many things people cannot accomplish by themselves, but many young men having difficulty in getting along with their friends and want to become executives. On the one hand, if you are competent in the profession, but have difficulty in getting along with your colleagues and even your boss, you can hardly survive to the corporation. On the other hand, your chances of success are much higher with wide circle of friends who are willing to cooperate with you to provide information and resources.

In view of the complexity of such an issue, we must treat it socially, economically and culturally. First of all, we can frequently use the drawings to enlighten to learn to cooperate successfully with each other. On the other hand, whatever difficulty we are confronted with, those who have the spirit of cooperation and team work are nearer to success. Only in this way can we achieve success.

5、

As is shown in the picture, there are two disabled men both with only one leg. They walk much faster than before while holding each other's shoulder. We can clearly see that the two persons could not walk at such a speed if they are not supported by each other, this is what we call "supported by each other, we can go anywhere".

It is clear that the picture tries to emphasize the importance of cooperation, which should not be overlooked in our society. Firstly, everyone has his or her advantages or disadvantages. Sometimes we can cooperate with each other to make up for the disadvantages, just as is shown in the picture above. Secondly, cooperation means less time and higher efficiency. Let me give an example here, if a company has only one staff, it is hard to run the company well, because there are not enough people to contribute their ideas and share the work burden, thus costing much time. Last but not the least, as for the present society, cooperation has become a feature of our age, we had better try to make good use of it instead of avoiding it.

To sum up, cooperation is the way to live better on the planet. Only when we get used to the cooperative style can we create a better future.

6、

As is vividly shown in the picture, we can clearly see that two men are holding each other's shoulders both with only one leg, They can walk faster in that they are

supported by each other, which is what we call “ supported by each other, we can go anywhere” .

The drawing aims to remind its audience a widespread phenomenon existing in workplace or daily life, that is cooperation. A triple of driving forces can explain the significance of cooperation. In the first place, people do have their points as well as the advantages. It is hard to make a success when there is only one staff in the company. In addition, cooperation means less time and higher efficiency. It is impossible for anyone to finish a work all by himself. Hence, people in mounting numbers put great emphasis on teamwork. In fact, it has been universally acknowledged that the ability of teamwork is the most essential qualification that anyone who wants to achieve success should possess.

According to what has been discussed above, we may safely draw the conclusion that cooperation plays an increasingly important role in our life that can't be ignored.

7、

As is portrayed in the picture, two persons are \_\_\_\_\_, running together with hands holding on each shoulders and leaving the crutches behind. It is surprised to find that the result of \_\_\_\_\_ surpasses the expectation through \_\_\_\_\_. At the bottom, a line of sentence is “\_\_\_\_\_”.

Apparently, what the cartoon adores is the spirit of \_\_\_\_\_ which plays a significant role in \_\_\_\_\_. And the advantages can be obvious in our daily work and life. To begin with, through cooperation, we can \_\_\_\_\_ so as to accomplish the things that \_\_\_\_\_. Facing a world with \_\_\_\_\_, we cannot be so perfect in everything because of \_\_\_\_\_. Therefore, we often need to \_\_\_\_\_. What's more, cooperation is not only \_\_\_\_\_ but also \_\_\_\_\_, supporting mutually and sharing resources with each other.

All in all, by cooperation among each other, we will be able to explore a wider world and reach further.

8、

How vividly the cartoon describes an inspiring drawing, in which two men \_\_\_\_\_, with their disabled legs bound and hands put on each other's shoulders, leaving the crutches behind. And a further interpretation lies in the picture “\_\_\_\_\_”.

Undoubtedly, we can deduce from the portrayal that \_\_\_\_\_. On the one hand, each individual has his deficiency in \_\_\_\_\_, but they may overcome it by \_\_\_\_\_.

\_\_\_\_\_. In other words, you can \_\_\_\_\_ by mutual corporation. On the other hand, \_\_\_\_\_ is much more powerful than the simple combination of \_\_\_\_\_. For instance, we know the example \_\_\_\_\_, that is the power of \_\_\_\_\_.

Judging from what have been argued above, we have come to realize \_\_\_\_\_. It is, therefore, necessary that \_\_\_\_\_. Not only should \_\_\_\_\_ but also they \_\_\_\_\_.

9、

As is shown in the drawing, two cripples leave their walking sticks behind and march forward side by side **on the left leg from one person and the right leg from the other.**

From this drawing we can see that **no obstacles can not be overcome** if two or more people unite as one and walk in step. Since there are too many limitations for a single man to **accomplish a great project or task**, we should reach out team spirit, which will be very beneficial as long as you are in a group, no matter **you are in school or society.**

As the proverb goes, unity is strength. The Chinese civilization has always given prominence to **social harmony, unity and mutual assistance.** Nowadays we are faced with many difficulties both at home and abroad. As long as we stick to **the unity of nationalities**, no one can obstruct us in the pursuit of our goals.

10、

As is illustrated in this picture, **two lame people** gather together to travel around the world although each of them has only one leg. This picture reflects a familiar phenomenon in today's society: cooperation is an important way of sustainable development. Only by cooperation can we achieve win-win results.

There are several reasons accounting for the opinion above. First and for the most, since we live in a modern city, we may forget how to choose the best way since high-speed lifestyle makes some of us lose ourselves. Accordingly, many people oppose cooperation, which they think they will take a risk. However, the fact shows that a company cooperating with another will be easier to achieve their target than the one who refuses to. This case is good enough to explain the view mentioned above. Secondly, via cooperation, we make use of advantages and evade disadvantages, because our shortcomings hardly found by ourselves will be evacuated and made up for under the help of others.

In conclusion, we should not deny the power of cooperation. On the contrary, we should promote cooperation when confronted with obstacles. I believe in this way the win-win success will be easier to achieve.

11、

As is depicted in the cartoon given above, we can see that **two disabled men** who only have one leg move forward arm in arm and side by side without the help of walking stick. This picture wants to tell us, as for me ,unity is a kind of power that can strengthen people.

As well as triangle is the most stable structure, human beings can be more powerful if uniting together. No man is perfect in this world, which means everyone has his defect that sometimes would be an obstruction, by which people will be stopped from achieving goals. Therefore, individuals learn to collaborate with each other in many aspects, such as working, studying or living. In addition, cooperation not only creates value for individuals but also for countries. It is a new theme of the times that cooperation leads to win-win results. For example, the international relations featured by win-win cooperation between Africa and China rapidly drive the economic and political development for two countries.

All in all, unity is a practical way for people to live a better life and for countries to pursue development.

12、

In this picture, there are **two disabled men** whose legs are both injured. One lacks his left leg while the other lacks his right leg. Both of them need to rely on the sticks to walk. However, when they choose to put the sticks aside and support each other, they are able to walk further. And the caption below reads, “you have a leg, and I have a leg; we can get everywhere as long as we are together”.

The aim of the drawing is to indicate that the cooperation and mutual help plays an increasingly important role in our life. On the one hand, sometimes we can solve problems by our own, but we also find that we can achieve our goals better and faster with others' help. On the other hand, during this constantly developing society, we should learn to cooperate with others, provide others with help and at the same time, share the success with our partners. Not only can we obtain the aims from the cooperation, but also we can offer help to each other.

In a word, it is a necessary ability for us to cooperate with each other. And we can do it from surroundings, such as group study for a course, cleaning the room together, or something else. Within the mutual help, we can learn a lot from others and benefit ourselves.

13、

As is vividly shown in the picture, **two men** who used to have to support themselves with walking sticks now are able to walk freely side by side with each other. Apparently, both of them are disabled, but by helping each other they make themselves complete again in return.

Since everyone has his or her own advantages and disadvantages, sometimes a team could work more efficiently than a single person. The spirit of cooperation is everywhere in our daily life. Take my experience as a volunteer for example. Once, my group leader of the volunteer association in our school asked me to plan a performance for a nursing home. I am good at planning those details so the work had been going on very well until the group leader asked me to be the host for the performance. However, I was really afraid of hosting any activities in front of the public. So I went to ask my group mate for help. Fortunately, he said that he is an expert in hosting and would like to help with the performance. At last, the activity turned out to be a great success.

All in all, we are all imperfect but able to make up for our disadvantages through cooperating with others. As long as we are aware of the significance of teamwork, we will achieve more in the world.

14.

As is vividly demonstrated in this picture, **two disabled men** with only two legs are running forward together under mutual support from each other with their arms. There is the caption reading “with one of your leg and one of mine, we could go anywhere we want to.”

Simply, the author tries to emphasize to us the significance of cooperation or teamwork spirit. In our life and work, we must have gone through a lot of fierce competitions and we can find that a hard work with cooperation could be more easily handled than by one person's effort. For example, cooperation are highly required in athletic contests such as football and basketball matches where no one can win a whole game by only his own effort but teamwork spirit can bring them this fruit. As Chinese saying goes: “Many hands make light.” Cooperation will bring us courage and confidence to overcome difficulties we are facing, and help us achieve greater success.

Accordingly, it is imperative for us to take some measures to enhance the sense of cooperation in our society. We should keep in mind that cooperation will help us deal with many hard nuts. As in this picture, one man may not go far with one leg but two man with two legs cooperated, they could run farther. It is nothing but cooperation that helps them make it.

15.

As is shown in the picture, \_\_\_\_\_ are running far away by

and strongly \_\_\_\_\_, with their \_\_\_\_\_ left behind. At the lower part of the picture is a caption, implying that \_\_\_\_\_.

Obviously, what is highlighted in the picture is \_\_\_\_\_. According to a survey conducted among a group of people who \_\_\_\_\_, those who are ready to give their cooperation to others all become \_\_\_\_\_ of all field, having no trouble \_\_\_\_\_. On the one hand, if you \_\_\_\_\_, but have difficulty in \_\_\_\_\_, you can hardly \_\_\_\_\_. On the other hand, your chance of success is much higher if \_\_\_\_\_ with you to provide information and resources.

It is my view, \_\_\_\_\_ ought to learn to \_\_\_\_\_. What is more, whatever \_\_\_\_\_ we are confronted with, those who have the spirit of \_\_\_\_\_ and \_\_\_\_\_ are nearer to success.

16.

As is vividly depicted in the picture, supporting each other with \_\_\_\_\_, **two handicapped adults** are continuing their new journey. Crutches left behind, they succeed in \_\_\_\_\_ to their final destination, regardless of the fact that \_\_\_\_\_. The caption below indicates, '\_\_\_\_\_.'

We can deduce from the picture that \_\_\_\_\_ plays a vital role in our daily life. It goes without saying that anyone \_\_\_\_\_ is likely to overcome the obstacles of life and achieve their destination. Unfortunately, the lack of \_\_\_\_\_ may lead to \_\_\_\_\_. No other case can better illustrate the consequence of what I have discussed than the picture above.

As far as I'm concerned, it is advisable for us to take steps to \_\_\_\_\_. Only in this way can we make the best value of confidence and embrace a bright future.

17.

It is presented in the picture above that with \_\_\_\_\_, **two men** each of

whom only has one leg are walking away with their \_\_\_\_\_. The meaning behind the picture is quite thought-provoking and the picture itself has been raising heated discussion among the public.

The drawer aims to illustrate the significance of \_\_\_\_\_. To begin with, through \_\_\_\_\_, we can heighten our strength so as to accomplish the things that are impossible to be done \_\_\_\_\_. We are all born with \_\_\_\_\_, and with the fast development of science and technology, we are confronted with a world \_\_\_\_\_. Therefore, we often need \_\_\_\_\_. What's more, \_\_\_\_\_ is not but \_\_\_\_\_. Making use of \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_ with each other, we can then attain to a capacity that \_\_\_\_\_.

To conclude, by \_\_\_\_\_, we will be able to explore a wider world and reach further.

18.

As is shown in the cartoon, there are **two disabled men** heading forward with their crutches left behind. And below reads the caption "\_\_\_\_\_". Evidently, it is \_\_\_\_\_ that makes it possible for these two men to travel anywhere they are in favor of.

There are numerous reasons for attaching significance to \_\_\_\_\_ with the following two being the foremost. To begin with, \_\_\_\_\_ requires that we must be citizens equipped with this kind of quality. In other words, \_\_\_\_\_. In the second place, none of us is perfect and it means that we need \_\_\_\_\_. For instance, \_\_\_\_\_.

As far as I am concerned, the general public is supposed to cultivate their awareness of \_\_\_\_\_. After all, only with the positive function of \_\_\_\_\_ are we able to play our potential to the fullest and achieve our goals more easily.

19.

It is vividly depicted that in the middle of the picture run **two disabled individuals**, holding to each other's shoulder and leaving the crutches behind, with the caption reading that "\_\_\_\_\_". Simple as the picture may seem, the true meaning lies within it is thought-provoking.

The picture tells us that \_\_\_\_\_ is not only necessary, but also indispensable. Through \_\_\_\_\_, people are able to overcome the constraints of \_\_\_\_\_.

their own, establish their career, fit into society and accumulate wealth. What is more, \_\_\_\_\_ has a vital role to play in \_\_\_\_\_. By making use of strengths of all members and sharing resources with each other, the working efficiency is doomed to be raised up.

On the basis of the discussion above, we may safely draw the conclusion that we can never stress the importance of \_\_\_\_\_ enough. And it is high time that we allocated due attention to \_\_\_\_\_. It is the intellectuals who are \_\_\_\_\_ that the society really desires.

20.

What is given above is a drawing that illustrates **two handicapped people** who leave the crutches behind and run forward rapidly despite that they each have only one leg. The truth revealed by the drawing is that importance should be attached to the \_\_\_\_\_ made by people from all walks of life.

The quality of \_\_\_\_\_ is of paramount significance when it comes to personal accomplishment in the ever-changing era. Take Ma Long, the Ping-pong champion of Olympic Games, for example. He would not be able to succeed without the generous help from his coach and colleagues. In other words, it is through \_\_\_\_\_ that shapes him into a winner. Furthermore, \_\_\_\_\_ functions as a booster in our society. A large proportion of the thorny problems can not get tackled unless professionals with different backgrounds make their joint efforts.

From my point of view, it is imperative for us to take some measures to enhance the sense of \_\_\_\_\_ in our society. We are supposed to keep in mind that \_\_\_\_\_ is conducive to ourselves and the society as well. Only in this way can we achieve success and can our community become harmonious.

21.

In the picture we can see that with their broke legs tied together, a man without the right leg walks along with another man without the left leg, leaving their walking sticks behind. There are two lines of words below, which reads "With your leg and my leg, we can travel around." There is no denying that the picture implies the importance of unity and cooperation without which we can sometimes fail.

As an old saying goes, "Unity is the power". Firstly, as an individual, we are not perfect to some extent and we need other's help now and then. If we insist our own ideas and resist any assistance, things would not go well as we expect. Then, for a society, unity is of vital importance. Do you still remember the Wenchuan earthquake? The disaster was ruthless, but our society was warm. After the earthquake, a large amount of relief supplies and rescuers were sent to the disaster-hit area. In face of the

unexpected disaster, the Chinese people were standing united and doing their utmost to overcome it.

In a word, it's not too much to overemphasize the significance of unity. Whenever we are in need, we can ask for help. And, society is a unit where we individuals are supposed to unit together to make it better.

22.

As is illustrated in the picture, **two crippled people** throw away their crutches and travel around the world together. This picture reflects that people who have deficiencies can easily fulfill their dreams when they cooperate with each other to make up for their respective deficiencies.

There are several reasons accounting for this. First of all, everyone has his own advantages and disadvantages. Someone's disadvantages are probably someone else's advantages. If these two people can cooperate with each other, their respective disadvantages will be offset by their partners' advantages and they can achieve their goals more easily. Furthermore, cooperation is not the simple addition but fusion of all partners' strength. Making use of different members' strong points, offsetting the weaknesses, supporting mutually and sharing resources with each other, we can then attain to a capacity that is much stronger than the sum of all partners.

From my point of view, we should realize the importance of cooperation. Whenever someone else needs a help, we should not hesitate to offer our assistance. Only in this way can we enhance the possibility of cooperating with others and achieve success more easily.

23.

The above picture depicts **two single-legged men** stride forward without crutches they have to rely on. This picture tells us that one person's strength is limited especially when he or she has a physical defect, but two disabled people's strength can conquer the world through cooperation.

The importance of cooperation cannot be overemphasized for the following reasons. Firstly, without cooperation, a person or organization cannot accomplish much in the increasingly interdependent society we now live in. It is the cooperation based on the complementary advantages that will contribute to the ultimate success. Secondly, cooperation can facilitate us to establish a close connection with others. Thus, whenever we need a help, we can turn to those who we used to cooperate with for help. Lastly, cooperation enables us to share resources with one another. Having more access to resources, we are more likely to succeed.

As far as I am concerned, I strongly suggest that people cooperate with others when they can, in that cooperation brings numerous benefits to both parties of the cooperation.

#### **24. On Mutual Aid**

In the picture above, two disabled men are running forward with each of their crippled legs bound together. The picture reflects a common phenomenon that we need to cooperate with others especially when we're in trouble. As the saying goes: more hands produce a stronger flame. Nowadays teamwork is very important in society.

Since we live in the fast developing society, we may encounter various problems. It's not uncommon for us to seek for help from others. Sometimes we can't solve the problems alone, so we have to work with others. What's more important, group work can create much higher efficiency and help us go even further. And if we help others in need, they will also give a hand to us when we're in dilemma.

It's of great importance for us to raise the awareness of cooperation. It's necessary for the society to advocate the spirit of helping each other. Only in this way can the individuals become stronger and then our country become more powerful and prosperous.

## **25. On Team Work**

As is vividly depicted in the picture above, two disabled people are running fast with one of their legs bound together and crutches left behind. They support each other with their firm hands. Though they are disabled, they can still go far with their team work.

What the picture shows to us is the team work. As we're living in the complex and diverse society, no one can be alone. We need to communicate with others. As a result, team work is very common in our daily life and we can't live without team work. Additionally, team work is also very important. When we are in trouble, we need others' help. Team work can help us solve the problem easily. As the saying goes, more people produce greater strength. In China, we emphasize the spirit of collectivism instead of individualism. We can benefit from the great power of the team work.

Team work is quite important. We need to have the team spirit and learn to support each other.
